 N/A^{-} – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire period.

*2015 performance represents performance from 9/30/15 through 12/31/15.

Small/Mid Cap Growth Equity Composite consists of all fully discretionary small/mid cap growth equity accounts. The Small/Mid ("SMID") Cap Growth Portfolio invests in small and medium-sized, high-quality growth companies holding leadership positions within their industries that the portfolio manager believes are capable of producing above average growth in a variety of market environments. The Portfolio will emphasize companies with a market capitalization between \$500 million and \$12 billion. To help control risk, the Portfolio is generally diversified among companies in a broad range of industries and economic sectors. The Russell 2500 Growth Index measures the performance of those Russell 2500 companies with above average price-to-book ratios and higher forecasted growth values. When sorted by market cap, the Russell 2500® Index consists of all of the companies in the Russell 3000® Index, except for the 500 largest companies by market capitalization in that index. The Russell Indices are a trademark of the Frank Russell Company, Indices are unmanaged and direct investment is not possible. The minimum account size for this composite is \$100,000.

Baird Equity Asset Management, formerly Baird Investment Management, claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Baird Equity Asset Management has been independently verified for the periods January 1, 2016, through December 31, 2023, by ACA Group, Performance Services Division and for the period January 1, 1993, through December 31, 2015, by previous Verifiers. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Small/Mid Cap Growth Equity Composite has had a performance examination for the periods September 30, 2015, through December 31, 2023, by ACA Group, Performance Services Division. The verification and performance examination reports are available upon request. GIPS® is a registered trademark of CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

As of January 1, 2007, the firm is defined as Baird Equity Asset Management (Baird EAM), a department of Robert W. Baird & Co., Incorporated that manages equity and balanced portfolios. Robert W. Baird & Co., Incorporated is registered as an Investment Advisor. The firm maintains a complete list and description of composites and limited distribution pooled funds and list of broad distribution pooled funds, which are available upon request. Total firm assets reflect the January 15, 2016, acquisition of Chautauqua Capital Management, LLC.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Pure gross of fee returns are supplemental to net of fee returns. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using actual fees.

The U.S. Dollar is the currency used to express performance. Pure gross returns have not been reduced by advisory fees but have been reduced by transaction costs for non-bundled accounts. The composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite for the entire period noted using pure gross of fee returns. Standard deviation is presented as a 3-year annualized standard deviation measure of risk using pure gross of fee monthly returns as of each annual period end. The performance results were calculated without consideration of the effects of any income taxes thereon, including withholding tax on foreign dividends. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The management fee schedule is 0.70% on the first \$50 million, 0.60% on the next \$50 million and 0.55% on the balance. All accounts existing prior to October 24, 2023, were grandfathered at their previous fee schedule. From September 30, 2015 to October 24, 2023, the management fee schedule was 0.85% on the first \$10 million, 0.70% on the next \$40 million and 0.60% on the balance. Actual investment advisory fees incurred by clients may vary. The Small/Mid Cap Growth Equity Composite was created September 30, 2015, and has an inception date of September 30, 2015.

The strategy focuses on small- and mid-cap growth style stocks and therefore performance will typically be more volatile than the performance of strategies that focus on types of stocks that have a broader investment style. The strategy may invest up to 15% of its total assets in U.S. dollar denominated foreign securities and ADRs. Foreign investments involve additional risks such as currency rate fluctuations and the potential for political and economic instability, and different and sometimes less strict financial reporting standards and regulations.

The Russell 2500 Growth Index measures the performance of those Russell 2500 companies with above average price-to-book ratios and higher forecasted growth values. Indices are unmanaged and are not available for direct investment.

The Baird Small/Mid Cap Growth Equity strategy (the "Strategy") has been developed solely by Robert W. Baird & Co. Inc. The Strategy is not in any way connected to or sponsored, endorsed, sold or promoted by the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). FTSE Russell is a trading name of certain of the LSE Group companies. All rights in the Russell 2500 Growth Index (the "Index") vest in the relevant LSE Group company which owns the Index. Russell® is a trademark of the relevant LSE Group company and is used by any other LSE Group company under license. The Index is calculated by or on behalf of FTSE International Limited or its affiliate, agent or partner. The LSE Group does not accept any liability whatsoever to any person arising out of (a) the use of, reliance on or any error in the Index or (b) investment in or operation of the Strategy. The LSE Group makes no claim, prediction, warranty or representation either as to the results to be obtained from the Strategy or the suitability of the Index for the purpose to which it is being put by Robert W. Baird & Co. Incorporated.

Operating Margin is a profitability ratio measuring revenue after the deduction of operating expenses. Revenue Growth is the total of operating revenues less various adjustments to gross sales. Revenue Growth does not include outliers defined as companies with Revenue Growth less than -50% and greater than 300%. Debt/Capital ratio is a measurement of a company's financial leverage. Debt/Capital ratio does not include outliers defined as companies with Debt/Capital greater than 500%. P/E Ratio (Forward 12 month) is a valuation of a company's current share price compared to its expected per-share earnings. Information Ratio is a measure of portfolio management's performance against risk and return relative to the benchmark. Alpha measures a strategy's risk/reward potential. A positive alpha means the strategy outperformed the index. A negative alpha means the strategy underperformed the index. Sharpe Ratio is a measure of historical adjusted performance calculated by dividing the portfolio's excess returns (average monthly returns minus the average monthly return of the Citigroup 3-month Treasury bill benchmark) by the standard deviation of those returns. The higher the ratio, the better the portfolio's return per unit of risk. Downside Capture is used to evaluate how well or poorly an investment manager performed relative to an index during periods when the index has risen.

The performance data quoted represents past performance. Past performance does not guarantee future results.
